Scientific Report Writing
(1 hour a week for 4 weeks)

For science students who need to write about experiments that they have done.

Course Aim and Outcomes

The aim of the course is that your writing shows familiarity with key University requirements for coursework.

To do this you will be able to:

- understand academic expectations in your field;
- write in an academic style;
- help readers to follow your ideas;
- use various sources of information appropriately;
- interpret data.

Course Content

Lessons are organised by sections (Introduction, Methods, Results, Discussion), with each class having a focus on language as well as structure. Class activities include analysis of writing from coursework and journal articles, language exercises, and short pieces of writing.

Materials

Provided by your teacher.
