

The true value of a unit of energy

Net Negative Carbon Energy for Local & Global Communities

This half-day workshop will bring together academics from engineering, economics, and law, policy makers, businesses and NGOs. Join us as we discuss the role of renewable energies in the sustainable development of rural communities, in particular, in Asia and in Sub-Saharan Africa. Further details are available overleaf. The workshop is free for all to attend, but registration is required. We look forward to welcoming you!

NEW ENERGY SPEAKERS PLATFORM

IN THIS WORKSHOP, HEAR FROM A MULTIDISCIPLINARY PLATFORM OF ENERGY ENGINEERS, LEGAL SCHOLARS, AND ECONOMISTS, DISCUSSING WAYS IN WHICH WE CAN ENSURE EFFICIENT, SUSTAINABLE, AND EQUITABLE USES AND DISTRIBUTION OF TECHNOLOGIES TO BENEFIT LOCAL COMMUNITIES. OUR AIM IS TO DEVELOP A METHODOLOGY TO EVALUATE THE IMPACT OF A SELECTION OF COMPACT, COST EFFECTIVE, NEGATIVE CARBON ENERGY TECHNOLOGIES THAT CAN BE EASILY RETROFITTED ONTO HOUSES AND COMMUNAL BUILDINGS IN AN OFF-GRID SETTING. EVENTUALLY, THESE EFFORTS MAY DISPLACE SOLID FUELS, PROVIDE VENTILATION OPPORTUNITIES, RESTORE AND IMPROVE THE QUALITY OF HEALTH AND LIVING CONDITIONS, PROVIDE LIGHTING AND CLEAN WATER, INCLUDING CLEAN ENERGY.
