

Design a university campus

Name _____

Your task for today:

A university campus is a place where students come to study a subject they really enjoy. This is usually when you're 18 years old after Year 13. Older students also come if they want to learn something new. Many students live on campus.

There are a range of facilities that university students need and find useful, all in one location. These include classrooms, labs, theatres, accommodation, cafes, restaurants, sports and arts facilities.

Instructions:

Now you know a bit more about university and the different facilities you are likely to find on a campus, have a go at designing your own campus.

On the other side of this page, you will see a map with an outline of the Brunel University London campus. Use the cut-outs of different university facilities and decide where you would put them on the map.

Stick the facilities on your map to design your own campus!
