23. EDUCATIONAL AIMS OF THE PROGRAMME

This programme in military and international history has the following educational aims:

- To provide students with an exciting, attractive academic programme in military and international history which is rigorous, flexible and coherent, through which students will acquire knowledge and understanding of the origins, course and consequences of warfare in the modern era – the synergetic combination of international and military history – and which will also allow students to gain knowledge and understanding of how diverse societies and cultures have engaged with war in history. The focus of the programme is on the modern period, with an emphasis on the post 1789 era.
- To ensure that students acquire the core skills, methods and theoretical approaches employed within the discipline of history and apply these competently to interpret data and evaluate different perspectives.
- To foster the core skills in military and international history and other key general skills to develop student powers of independent enquiry, analysis and judgement, which enhance study of history and transfer usefully into employment.
- To provide key transferable research skills to proceed to further study at postgraduate level.
- To provide key transferable skills to further professional development.
- To enable students, through a Work Placement, to develop skills and knowledge relevant to work and professional development (4 yr thick sandwich mode)

24. PROGRAMME AND INTERMEDIATE LEARNING OUTCOMES

The programme provides opportunities for students to develop and demonstrate knowledge and understanding (K) cognitive (thinking) skills (C) and other skills and attributes (S) in the following areas:

Level	Category (K = knowledge and understanding, C = cognitive (thinking) skills, S = other skills and attributes)	Learning Outcome	Associated Assessment Blocks Code(s)	Associated Study Blocks Code(s)	Associated Modular Blocks Code(s)
1					
	K	Knowledge of the different empirical and theoretical approaches employed in the study of military and international history.			PX1601, PP1609, PX1607
	K	Knowledge of military and international History.			PX1604, PX1606, PX1608
	C	An ability to analyse primary and secondary sources. (Primary sources are principally texts, but can include posters, maps, artefacts and any item with a direct relationship to the past).			PX1604, PX1606, PX1607

Learning/teaching strategies and methods to enable learning outcomes to be achieved, including formative assessments

Teaching and learning methods are developed in detail within the documentation for each module. However, the aim of the programme is to provide students with effective training in the skills required for an honours degree, and subsequently for the workplace, and to encourage them, with tutorial support, to take responsibility for their own learning as they develop their powers of critical reasoning and independent judgement. Teaching methods are diverse, reflecting the aims of modules at each level, available resources, and the demands of subject material. Teaching and learning strategies include lectures, seminars (often student-led and with structured student oral contributions), workshops (usually involving students working in small groups or with computers), case studies (which may involve degrees of statistical analysis), audio-visual presentations, fieldwork and external visits. Constructive feedback on both formative and summative assignments provides students with the opportunity to engage intellectually with the material and to enhance their skills and performance. The stress is consistently on the logical analysis of the nature and utility of data and on their interpretation in the broad context of national and international scholarship in the respective disciplines. Use is encouraged of computers, relevant software and data sets. In 4 year thick sandwich mode, a workshop and tutorials are provided, associated with the work placement.

Summative assessment strategies and methods to enable learning outcomes to be demonstrated

The programme's assessment strategy is to use a variety of assessment methods to test students' abilities in applying their knowledge and skills. This is effected through coursework essays (which can include, where appropriate, the use of statistical data, maps, diagrams, charts, pictures, photographs and other non-text based explanatory methods and devises), article reviews, short assignments and presentations, alongside exams, with varying weights (but normally either 40:60 or 25:75). In the first level, term 1, coursework only assessment is designed to facilitate the students' transition to into undergraduate study without the pressure of exams. In a 4 year thick sandwich work placement, students will complete a log book of the placement and an extended critical analysis, reflecting on professional development and its connection to their academic programme of study.

25. Programme Structure, progression and award requirements

Programme structures and features: levels, assessment blocks, credit and progression and award requirements

- **Compulsory block:** one which all students registered for the award are required to take as part of their programme of study. These will be listed in the left hand column;

- **Optional block:** one which students choose from an 'option range'. These will be listed in the right hand column;
- A **core assessment** is an assessment identified within an assessment block or modular block (either compulsory or optional) which must be passed (at grade D- or better) in order to be eligible to progress and to be eligible for the final award. All core assessments must be specified on the programme specification next to the appropriate assessment or modular block:

Where students are expected to pass the block at D- or better, but not necessarily all elements, then the block itself is core.

e.g. AB3000 Project (40)
Core: Block

Where only some elements of assessments are required to be passed at D- or better, these will be identified by listing each element that is core

e.g. ABXXX1 Title (XX credits)
Core: 1 & 4

Where students are expected to pass all assessments in a block then this will be identified. By setting the assessment this way, students are also required to pass the block by default. This will be identified thus:

e.g. ABXXXX Title (XX credits)
Core: All, Block

- A **non-core assessment** does not have to be passed at grade D- or better, but must be better than a grade F, in order to progress and to be eligible for the final award.

Please note: this specification provides a concise summary of the main features of the programme and the learning outcomes that a student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods can be found in the modular, assessment and study block outlines, and other programme and block information. The accuracy of the information contained in this document is reviewed by the University from time to time and whenever a major modification occurs.
