Programme Specification for Postgraduate Programme
Leading to:
MSc Water Engineering

Applicable for all postgraduate students starting in 2019

<table>
<thead>

**Postgraduate Taught Programme**

1. Awarding institution
   Brunel University London

2. Teaching institution(s)
   Brunel University London

3. Home college/department/division
   College of Engineering, Design and Physical Sciences/Department of Civil and Environmental Engineering

4. Contributing college/department/division /associated institution
   None

5. Programme accredited by
   The programme has been accredited by the JBM. CIWEM accreditation has been applied for.

6. Final award(s) and FHEQ Level of Award
   MSc Water Engineering - FHEQ Level 7

7. Programme title
   MSc Water Engineering

8. Programme type (Single honours/joint)
   N/A

9. Normal length of programme (in months) for each mode of study
   12 months

10. Maximum period of registration for each mode of study
    Normal duration plus 2 years, up to a maximum of 5 years.

11. Variation(s) to September start
    None

12. Modes of study
    FT

13. Modes of delivery
    Standard

14. Intermediate awards, titles and FHEQ Level of Award
    PG Certificate, Civil Engineering - FHEQ Level 7
    PG Diploma, Water Engineering - FHEQ Level 7

15. UCAS Code
    N/A

16. HECoS Code
    TBC

17. Route Code
    H200PWATEREN

18. Relevant subject benchmark statements and other external and internal reference points used to inform programme design
    UK Quality Code for Higher Education
    QAA Subject Benchmark Statement (Engineering)
    Brunel University London 2030
    Brunel Placement Learning Policy, as published under the ‘Placements’ section of the ‘Managing Higher Education Provision with Others’ page.
    Engineering Council, UK-SPEC document “Chartered Engineer and Incorporated Engineer Standard”
    JBM guidelines on Technical Masters taught programmes
    CIWEM Guidelines
19. Admission Requirements
Details of entry requirements are provided on the University’s and College website. Levels of English for non-native speakers are outlined on Brunel International’s language requirements pages.

20. Other relevant information (e.g. study abroad, additional information on placements)
N/A

21. Programme regulations not specified in Senate Regulation 3. Any departure from regulations specified in Senate Regulation 3 must be stated here and approved by Senate.
N/A

22. Further information about the programme is available from:
Course webpage

23. EDUCATIONAL AIMS OF THE PROGRAMME

The primary aim of this programme is to create master’s degree graduates with qualities and transferable skills for demanding and rewarding employment in the Water Engineering sector. The graduates will have the independent learning ability required for continuing professional development and acquiring new skills at the highest level.

Specific aims are as follows:

- To provide education at postgraduate level in Civil Engineering.
- To develop the versatility and depth to deal with new, complex and unusual challenges across a range of Water Engineering issues, drawing on an understanding of all aspects of water engineering principles.
- To develop imagination, initiative and creativity to enable graduates to follow a successful engineering career with national and international companies and organisations.
- To provide a pathway that will prepare graduates for successful careers including, where appropriate, progression to Chartered Engineer status.
## 24. PROGRAMME AND INTERMEDIATE LEARNING OUTCOMES

The programme provides opportunities for students to develop and demonstrate knowledge and understanding (K) cognitive (thinking) skills (C) and other skills and attributes (S) in the following areas:

<table>
<thead>
<tr>
<th>Level 7</th>
<th>Category (K = knowledge and understanding, C = cognitive (thinking) skills, S = other skills and attributes)</th>
<th>Learning Outcome</th>
<th>Masters Only</th>
<th>Associated Assessment Blocks Code(s)</th>
<th>Associated Study Blocks Code(s)</th>
<th>Associated Modular Blocks Code(s)</th>
</tr>
</thead>
<tbody>
<tr>

Learning/teaching strategies and methods to enable learning outcomes to be achieved, including formative assessments

- Study
  Students will be introduced to subject material, including key concepts, information and approaches, through a mixture of standard lectures and seminars, laboratory practicals, field work, self study and individual research reports. Supporting material will be provided via Blackboard Learn. The aim is to challenge students and inspire them to expand their own knowledge and understanding.
- Work
  Preparation for work will be achieved through the development of 'soft' skills such as communication, planning, management and team work. In addition, guest speakers from industry will provide a valuable insight into the real world of civil engineering.
- Play
  Many of the practical activities in which the students engage develop into enjoyable experiences, for example working in teams for laboratory work and field work. A Civil Engineering Society, CivSoc, run by the students (with limited staff support) forms the focus for many extra-curricular, and fun, activities.
- Grow
  We encourage students to develop personal responsibility throughout the course. Many elements of coursework involve, and reward, the use of initiative and imagination. Students are guided into this through the use of an assessed Personal Development Log which is linked to one-to-one tutorials. This aids them in developing reflective skills.

Summative assessment strategies and methods to enable learning outcomes to be demonstrated.

Assessment will allow students to demonstrate their abilities in a range of styles relevant to professional Water Engineers. These will include:

- Essays – demonstration of depth and breadth of knowledge and written communication skills
- Presentations and posters – ability to summarise and communicate orally and visually
- Technical analytical reports – ability to collect, analyse and interpret a range of evidence, including in the field and laboratory
- Design reports – ability to use imagination, creativity, innovation and judgement to address a specification
- Group report – contribution as a team member to a collaborative challenge
- Project proposal – ability to identify a research/design focus and produce a realistic plan for its execution
- Personal Development Log – develop ability to reflect on learning and planning development goals
- Formal examinations – ability to quickly formulate arguments and solve problems
- Dissertation (MSc) – ability to plan, execute and communicate an advanced piece of research – CE5xxx, the Civil Engineering Dissertation specification, requires students to undertake research relevant to their specific programme.

Deadlines will be distributed through the year, allowing time for constructive feedback.

25. Programme Structure, progression and award requirements

Programme structures and features: levels, assessment blocks, credit and progression and award requirements

- **Compulsory block:** one which all students registered for the award are required to take as part of their programme of study. These will be listed in the left hand column;

- **Optional block:** one which students choose from an ‘option range’. These will be listed in the right hand column;

- A **core assessment** is an assessment identified within an assessment block or modular block (either compulsory or optional) which must be passed (at grade C- or better) in order to be eligible to progress and to be eligible for the final award. All core assessments must be specified on the programme specification next to the appropriate assessment or modular block:

  Where students are expected to pass the block at C- or better, but not necessarily all elements, then the block itself is core.
  e.g. AB5500 Project (40)
  Core: Block

  Where only some elements of assessments are required to be passed at C- or better, these will be identified by listing each element that is core
  e.g. ABXXX1 Title (XX credits)
  Core: 1 & 4

  Where students are expected to pass all assessments in a block then this will be identified. By setting the assessment this way, students are also required to pass the block by default. This will be identified thus:
e.g. ABXXXX Title (XX credits)
Core: All, Block

- A non-core assessment does not have to be passed at grade C- or better, but must D- or better in order to be eligible for the final award.

</table>

As per Senate Regulation 3

PGDip may not be awarded by substitution of the dissertation (CE5516) for modular/assessment blocks in the taught part of the programme.

Please note: this specification provides a concise summary of the main features of the programme and the learning outcomes that a student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods can be found in the modular block, assessment and study block outlines and other programme and block information. The accuracy of the information contained in this document is reviewed by the University from time to time and whenever a modification occurs.
