

Academic Reading
(2 hours a week for 4 weeks)

Course Aim and Outcomes

Students develop a range of skills for reading efficiently and effectively for the purpose of successfully writing academic assignments.

To do this you will be able to:

- use appropriately a range of reading strategies for reading academic texts;
- develop vocabulary building strategies that are relevant to academic reading;
- develop note-making skills;

Course Content and Materials

Skills practiced on the course include reading journal articles, distinguishing between main points and supporting details, making notes, applying critical thinking and dealing with new vocabulary.

Materials are provided by the teacher.
