Academic Writing for Engineering (Zoom)

1 hour a week for 5 weeks

Course Aim and Outcomes
The aim of the course is that your academic writing shows familiarity with key University requirements for coursework.

To do this you will be able to:

• understand academic expectations in your field;
• write in an academic style;
• help readers to follow your ideas;
• integrate visual elements appropriately;
• show evidence of critical thinking;
• use various sources of information appropriately;

Course Content
Lessons are organised by sections (e.g. problem statements, design, design specification, visuals, interpreting results), with each class having a focus on language as well as structure. Class activities include analysis of writing from coursework and journal articles, language exercises, and short pieces of writing.

Q & A (Questions and Answers)
For those who are interested, there is an additional 30 minutes after which you can stay to ask questions that are relevant to all participants.

There is also an extra Q&A session after the course has finished. It would be very helpful if participants send in their questions before the session.
