

What are we working on for 2020?

- Investigating a suitable reusable solution to replace disposable take a way hot and cold food containers.
- Ways in which we can reduce kitchen “cling film” usage and dependency.
- Introduction of a food waste sharing app
- Improving the capture of disposable coffee cups for recycling, through education and marketing.
- “Know your Food” Boards to be sited around campus. These will display various pieces of information to educate the campus population on recycling efforts, Health & Wellbeing activities and dietary facts.
- Increased promotion and activity surrounding vegan and vegetarian offers available on campus.

....Also continuing the work and projects already started and embedded at Brunel University London to reduce our impact on the environment.
